SIBERIAN/UKRAINIAN ART EXHIBITION 1994

During last year's Siberian Art exhibition, we managed to sell over a third of the works and were able to return to the Siberian artists over eight thousand dollars. I went to Irkutsk to hand over the money to the artists and am pleased to say that the benefits resulted in permanent improvements to their standard of living.

It is therefore very satisfying to have the chance to show again an increased scope of works from what are still relatively unfamiliar parts of the former Soviet Union.

Works exhibited this year are from Irkutsk and Kiev, cities lying six thousand kilometres apart and yet having common historical and, to some extent, cultural roots.

The works from Siberia still very much reflect the harsh but beautiful nature and environment of Lake Baikal and its surroundings, contrasting with the warmth of the human spirit which lives there.

From Kiev, you will see a different approach reflecting the proximity to Western Europe and the rich cultural history of Kiev, which dates back to the eleventh century.

Again I wish to thank Mr and Mrs Martin Laing for their continued help and the Mall Galleries for their interest and co-operation.

Please sign the visitors' book if you would like to be contacted about future similar exhibitions that we may organise.
